

Smart Watch

Model No.: T1

User Manual

Thank you for choosing our product. For safe and optimal use of the watch, please, read this guide carefully before getting started.

Warnings and safety instructions

- Please, do NOT take out the SIM card when the watch is powered on. It could cause damage to the watch.
- Keep the watch away from fire and avoid high temperature environments.
- The watch does not prevent data roaming. It can create expensive data traffic when used in a different country with the same SIM card.
- The watch and the mobile app are continuously developed. Their functions and language can slightly differ from this manual. Use this document as a reference only.

1 Before you begin

- Make sure the watch is fully charged before you start the installation. It is recommended to charge the watch for at least 12 hours before the first use.
- The watch support 2/3/4G network (Europe Version:2G GSM band: 900/1800;3G WCDMA:B1/B2/B8;4G LTE:FDD B1/B3/B7/B8/B20.North American Version:2G GSM:1900;3G WCDMA:B2/B4;4G LTE:FDD B2/B4/B5/B7/B12/B17) but it is recommended to ask your dealer which service operators support your watch in your area.
- The watch operates with a nano SIM card. Normal and micro SIM cards cannot be inserted and will damage the watch which will result in losing the warranty.
- It is not possible to enter a PIN number with the watch so make sure you use a SIM card that does not require a

formaterede: Skriftfarve: Tekst 1

PIN number when inserted or remove the PIN security in a mobile phone before you insert it in the watch.

2 Charging the watch

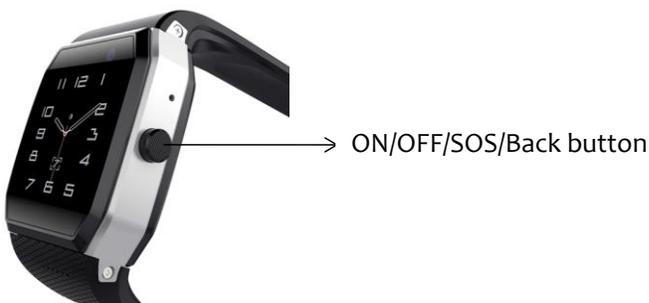

Remove the watch and the charging cable from the packaging. Connect the magnetic head of the cable to the metallic contacts on the back of the watch (rotate the connector until the magnets pull it in position) and connect the other end of the cable to a USB power source.

Charging the watch to its full capacity normally takes 2-3 hours. **You can see the dynamic battery icon on the screen to judge whether it is fully charged.**

However, for the first time, please, charge the watch for 12 hours and 8 hours for the second and third times to ensure a long battery life.

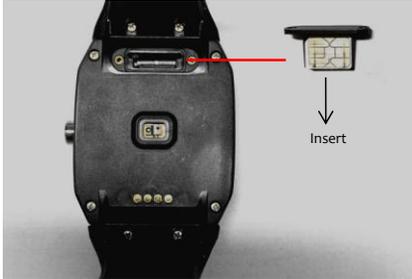

3. The watch (for the User which use the watch)

Below you will find the description and operation of the watch.

3.1 Powering on

- Before turning on the watch, open the SIM card slot cover and insert the nano SIM card as shown on the picture.

- Push far inside until can't push anymore.
- Secure the SIM card slot with screws to prevent it from falling out and water damage.

Note: after you insert the sim card and turn on the watch and wait 1-2 minutes, if under time display interface , move finger from top to end to see a **setting** interface , you can see if have  symbol display on watch ,if not ,the watch may not support your telecom operator. please contact the distributor to check with your sim card APN setting.In future using, if press button and see without  symbol display, you might have run out of your data package or the coverage is not enough for data transfer.

If have the  symbol ,you can see watch is under wifi or Lbs or GPS positioning.

the watch can only be turned off remotely. Go to application main menu Manage-Remote watch turn off function.

Note: only the administrator can turn off the watch from the APP.

4. Operating the mobile application

With nano sim card installed in watch and watch powered on, wait till see the  symbol on watch display, now you can start using the application. Please, follow the steps below.

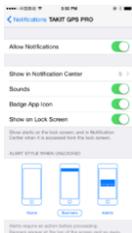

4.1 Downloading the mobile application

Please, search for and install one of the following software:

- For Apple phones, search for “TAKIT GPS PRO” in the App Store.
- For android phones, search for “TAKIT GPS PLUS” in the Google Play store.
- Allow pushing notification function on your phone

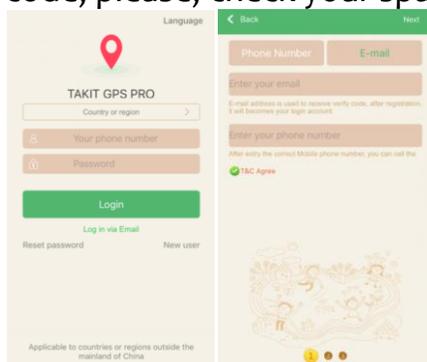

Once the software is installed,

Note: on your mobile phone settings-notifications-TAKIT GPS PRO should turn on all the buttons of allow notifications as below:

4.2 Registering a user and logging in

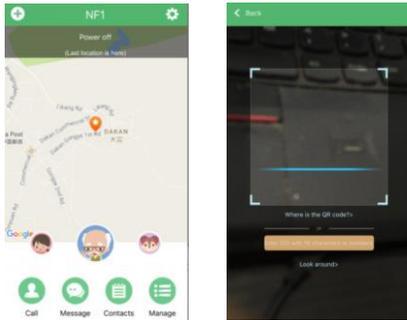

- Tap **new user** to start the registration process.
- Select **Mobile** or **Email** to create your user account.
- If you select **Mobile**, the verification code will be sent to you in an SMS message to the given phone number. This number will be one of the registered phone numbers that can communicate with the watch.
Note: in countries where the local mobile number starts with a zero (0), please, register with an email address. The verification code cannot be sent to these kinds of phone numbers.
- If you select **Email**, the verification code will be sent to you in an email.
- Note: if you do not receive the email with the verification code, please, check your spam box or spam quarantine.

4.3 Setting up the application (connecting to a watch)

Once you are logged in the mobile app, do the following to connect it to the watch:

1. Tap  to register your watch.

2. There are two ways to register the watch. Either by scanning its QR code or by manually entering its CID:

- **To scan the QR code:** Tap the middle of the screen to start the camera (allow using the camera if asked). Now scan the QR code that is on the back of your watch or on the outside of its packaging. Move the QR code towards or away from the phone until it is read automatically.
To enter the CID number: Tap enter CID, type in the CID number and then tap OK. (you can also see CID on watch , Slide from top to bottom on the watch,then slide from left to right,touch the  to show the QR code of the watch.

3. On the next screen, select the female/male/type

4. Enter the name of watch wearer and phone number on the SIM Card that you will insert into the watch. Tap next.

5. Select your relation to the user. Tap done.

Note: the user who first links its phone to the watch will become the administrator of that watch. This can be changed later.

4.4 Main functions

The following section is a brief description for mobile APP.

4.4.1 Map screen

The Map screen shows the location of the linked watches on the map as well as provides ways of communication between the app and any of those watches.

The Map screen is also the first screen you see when you start the software.

When started, the software shows all connected watches on the map. You can slide head image  to select any of the watches to communicate with.

The software uses Google Maps to locate the watches. To better understand the location of the watches, you are offered three map visualization modes: Satellite, 2D and 3D. Tap  to switch between these options.

Warning: choosing Satellite mode may result in excessive data use in your mobile phone.

4.4.2 Main Menu:

- Tap map to enter the map page, Tap  to see the current location of the watch. This will only work if the watch is turned on with an inserted SIM card; the SIM card has sufficient data.
- Tap  to see a sequence of previous locations of the watch. Tap  to choose a period of time to display.
- Tap  to change the application language and check the application version
- Tap  to choose call or monitor watch
- Tap  to see your number of steps,
- Tap  to see the heart rate ,tap  at the heart rate interface to off/on the heart rate monitor and set the frequency.You can also touch  on the watch to see your heart rate,the results will also upload and show on the APP.

4.4.2.1 Call and Monitor

Tap **call** to start a phone call ,Tap **Monitor** to listen the watch. On the Monitor mode, the watch will automatically pick up the call without making a sound.

This allows the guardian to listen into the watch environment without being noticed. Tap **Make a video call to start a video calling.** (pls noted , only watch which has video calling function can support this function)

And also app must work at backstage(online) ,and network is good if want to start video calling on watch successfully.

4.4.2.2 Message

- Tap **Message** to jump to the messages screen.
- When there is an incoming message for the watch, or alerts for SOS, low battery, Enter/Exit Geo-fences, Change of administrator's rights etc, a red dot will appear on the icon **Message**. Tap to check new messages or alerts.
- Press and hold  to speak, then release the send voice message.
- Tap  to start remote take photo on watch, the watch will take a photo now and send to you, wait for seconds, then you can receive the picture.

4.4.3.3 Contacts and administrator

- Tap **Contacts** to see the list of phones and users linked to the watch. The administrator of the watch is displayed at the top. The administrator can add, modify or delete any family member in the list and transfer the administration right to Backup administrator.
- Administrator can add contacts phone number even the numbers were not of accounts that registered in the APP.

4.4.3.4 Manage watch setting

Tap Manage to set up other watch parameters or initiate additional functions:

(1) watch user information: Tap the name next to Avatar takes you to edit page of name, phone number of watch etc.

(2) Tap Manage Fence list:

Tap Fence list to check or set up geo-fences. You can set up multiple geo-fences of rectangular or circular shape.

(3) Mute: You can set up multiple time intervals when the watch will remain silent even if there is an incoming call or message.

(4) Location mode: You can choose between two options:

- **Smart mode:** the watch location is updated automatically when the watch is moving outside.
- **Manual mode:** the location will only be updated when you tap the **Loc** button on the Map screen.

Note: Automatic mode uses more battery.

(5) Remote watch turn off: *If a SIM card is inserted, the watch can only be turned off remotely from the app by administrator, before doing this in APP, an automatic watch power on time can be set.*

(6) Remote reset: *Tap this to reset the watch.*

(7) Watch tracking: *This function will help you locate the watch by instructing the watch to play a loud sound effect. Press any button on the watch to silence it.*

(8) Restore factory setting: *Tap  at top right corner to see “Restore factory settings”, when confirmed, all contact list of watch will be cleared.*

Note: only Administrator can use this function.

5 FAQ

Please, find the most often asked questions and their answers below.

(1) I cannot turn on the watch

The battery in your watch might have run out of power. Please, connect the watch to a power source until fully charged and then try again.

(2) I cannot scan the QR code

The following methods can help your phone read the QR code:

- If the ambient light is low, move to a brighter area and retry scanning the QR code.
- Try adjusting the distance between the QR code sticker and the camera of the phone so that the auto focus can

make a sharp picture and the QR code is large enough to reveal its details.

(3) What operation systems is the APP compatible with?

The mobile application is compatible with iOS watches running iOS7.0 or newer operating systems and android watches running android 4.0 or newer.

(4) How to transfer the administration right to another person?

Only the administrator can transfer this right.

- Open the mobile application.
- Log on as the administrator of the watch.
- Open the **Master list** of the selected watch in the Main menu.
- Tap and hold one of the Backup administrators.
- Tap Transfer Administration Rights in the popup menu.

Note: only Backup administrators can receive the administrator right. Other added phone numbers cannot.

(5) How to delete a previously added phone number?

Only the administrator can delete phone numbers.

- Open the mobile application.
- Log on as the administrator of the watch.
- Open the **master list** of the selected watch in the Main menu.
- Tap and hold one of the numbers in the list.
- Tap **Delete** in the popup menu and confirm your choice.

Please reset the watch before offering the watch to a new user, otherwise, the first caregiver of new user could not become administrator.

(6)How to prevent other people from adding the watch to their phone?

As the administrator of the watch, you can keep others from extending the Family list.

- Open the mobile application.
- Log on as the administrator of the watch.
- Open the **master list** of the selected watch in the Main menu.
- Tap the gear button near the bottom right corner.
- Tap the switch next to **Allow guard** to disable this feature.
